

Business Advanced

CSoft

Customised Business Software

Small and Medium sized Business have just as complex needs as larger businesses and yet often lack the IT budget or Staff to address those needs. Business Advanced is a product that can help address those needs and allow for growth when the organisation expands. Business Advanced is built around the successes of our current systems.

Who we are...

CSB is your Management partner

CSoft is a complete integrated business system, whether managing accounts, sales, production, job costing or customer contacts - all in one easy and ready to use system. CSoft is fully customisable, truly adaptable and simple to use, enabling you to access critical information quickly and easily. CSoft enables you to make smart business decisions, so that as your business needs change and grow, our system can adapt and grow to meet those demands.

CSoft is designed by accounting and business professionals for astute business owners. From the release of version 1 in 1998, we now have users in Australia, New Zealand, Hong Kong, Thailand, South Korea and South Africa. Our clients boast some of the regions most professional and innovative businesses in a diverse range of industries.

We have the flexibility to work with companies from one user, through to much larger organisations with multiple users in different locations. We will work with you to provide the ultimate in Accounting and Management Solutions ensuring your business objectives are achieved.

Our Competitors

Other commercial software providers only allow you to change settings to make the system fit your requirements. They will not be able to provide you with a truly customised solution or will only be able to offer an expensive solution after many months. We specifically tailor and customise our software to suit YOUR business.

Staying in Control

Keep on top of critical tasks with system generated alerts.

- ✓ In contact management, set reminders when you are next due to see a contact
- ✓ Have special reports produced for you
- ✓ Produce reports when you want them
- ✓ Add reports to your end of day or end of month list to be automatically generated

"Having CSB as your technology partner will save you time and money, letting you get on with the job."

"When it matters most, will your Accounting and Management Software system save you, or bury you?"

Desktop

With today's challenging technology choices, you need to be able to have choices. CSoft offers the following options for the desktop.

Operating System	Stand-alone PC	Terminal Services
MS Windows	✓	✓
Java Web Forms	✓	✓

Server

CSoft runs on MS Windows delivering a complete application that can manage hundreds of users. With all data stored on a central database, eliminating redundant data re-entry, all your departments can work collaboratively to increase customer satisfaction and key business efficiencies.

Web Based

The internet has become one of the most popular and important ways to expand your business, helping to attract customers, increase sales growth and take you to the next level of success. CSoft Web will provide you the opportunity to enter data using the Internet from anywhere. You can also use our Web Interface to enable you to receive orders via the Internet. Use your own web designs and build our functions into your web pages.
