

CSoft - Basic

Small Business have just as complex needs as larger businesses and yet often lack the IT budget or Staff to address those needs. **CSoft Basic** is a product that can help address those needs and allow for growth when the organisation expands. **CSoft Basic** is built around the successes of the other products in our range.

A New business, in either start up or expansion mode, has as its first priority the need to record their Financial and Other data. They need a small Financial system that works and will manage their recording requirements without change.

CSoft Basic is aimed at the Small Business that need to start with a small but stable system.

"Having CSB as your technology partner will save you time and money, letting you get on with the job."

Who we are

CSB is your Management partner.

CSoft Accounts is a fully integrated solution, managing sales, production, job costing and contact management in one system. It is affordable and truly adaptable, Simple to use enabling you access critical information quickly and easily enabling you to make smart business decisions The system can grow as your business does.

Designed by accountants for small to medium business owners. From the release of version 1 in 1998 we now have users in Australia, New Zealand, Hong Kong, Thailand, South Korea. Our clients boast some of the regions leading and largest business.

We have the flexibility to work with companies from one user, through to much larger organisations with hundreds of users in many locations. We will work with you to provide the ultimate in Accounting and Management Solutions ensuring your business objectives are achieved.

Our Competitors

Other software providers only allow you to change SETTINGS to make the system fit your requirements otherwise you have to fit in with their way of operating. If you have a special way of calculating data e.g. your quotes they will not be able to provide you with a truly customised solution or will only be able to offer an expensive solution after many months..

Staying in Control

Keep on top of critical tasks with system generated alerts.

- When jobs or processes have milestones that need monitoring, our system can produce lists and alerts to the appropriate person to ensure that the work is done on time.

In contact management set when you are next to see a contact, set it up and let the system put them on your list, it will stay there until you mark them off as done.

Get the reports you need when you need them.

- Have any special reports produced for you.
 - Produce any reports when you want them.
- Or add to your end of day or end of month list to be automatically generated.

"When it matters most, will your Accounting and Management Software system save you, or bury you?"

CSoft Desktop

With today's challenging technology choices, you need to be able to have choices. CSoft offers the following options for the desktop.

Operating System	Stand-alone PC	Terminal Services
MS Windows	✓	✓
Java Web Forms	✓	✓

CSoft Server

CSoft Accounts can run on MS Windows Servers, delivering a complete application that can manage hundreds of users. With all data stored on a central database, eliminating redundant data re-entry, all your departments can work collaboratively to increase customer satisfaction and key business efficiencies.

CSoft Web Based

The internet has become one of the most popular and important ways to expand your business, helping to attract customers, increase sales growth and take you to the next level of success.

CSoft Web (under development) will provide you the opportunity to enter data using the Internet from anywhere.

You can also use our Web Interface to enable you to receive orders via the Internet. Use your own web designs and build our functions into your web pages.
