

CSoft Business Software

Product Module

Overview

Available in CSoft Business Startup and Business Advanced.

The product system is a very flexible system that allows product entry and product groups. We have provided the ability to have separate price types for customers, and to have different selling units.

Features

Some of the features included in the Product Module are:

- ✓ Products can be grouped
- ✓ Products can be entered by location
- ✓ Multiple selling prices
- ✓ Multiple selling units
- ✓ Various reports by product standard
- ✓ Products can be valid or non valid
- ✓ Any length product codes

Stock

This is a fully comprehensive system which is linked to the creditors and product files. This allows tracking of goods on Sales orders and Purchase orders as well as stock on self from the same place. Sales analysis is available as is full stock reporting i.e.: stock take reports etc.

- ✓ Outstanding invoices can be listed with an estimated value thereof.
- ✓ Stock take entries and reports on stock values are standard.
- ✓ Inventory code is alphanumeric
- ✓ The various sales prices can be named
- ✓ Multi vendors can be associated with an item
- ✓ Supplier part numbers can be recorded against an item
- ✓ Inventory can be automatically valued on FIFO basis/LIFO basis
- ✓ System can handle recording of various stages of manufacture from raw materials to finished product
- ✓ Users can search on item codes and descriptions
- ✓ Stock wide price updates can be carried out
- ✓ Stock take results can be entered and posted at later stage
