RFID Technology in association with Axeze

Overview

**There is a new technology on the market called RFID.
It stands for Radio Frequency Identification.**

The technology uses radio waves to identify one or multiple objects.

**We are now looking at a completely different way of dealing with
Stock, Handling of timesheets, Dealing with Security**

**Examples of how the technology can be used in a day to day business
environment are as follows:**

- ✓ One click Stock takes.
- ✓ Monitor movement of stock as it moves through the Production Cycle.
- ✓ Tag high value items for easier tracking.
- ✓ Tag boxes or items so that when they are stored they can be located at an instance.
- ✓ Asset Management now becomes a breeze. Locate and confirm any asset.
- ✓ Personal Management – can be used to identify who checks in or who checks out.
- ✓ Monitor when staff arrive at work.
- ✓ Monitor who comes into the Gym.
- ✓ Monitor a multiple of security access points.
- ✓ Protect high value items.

**And of course integrated into Csoft to make your life even easier with
the help of Axeze’s intelligent systems and expertise!!**

**Call to discuss pricing as it will depend on the level of complexity,
number of items etc.**
