

CSoft Business Software

Web Interface

Overview

This is a full interface with the General Ledger System, operating in real time for the purpose of online ordering of product. The number of users who can be online at any one time, is determined by the number of user licences.

Web Interface

- ✓ Auto update of info.
- ✓ Tracking of visitors so that you can track how many customers use the site
- ✓ Security – this can be set to your requirements with password only access.
- ✓ Start with a log on page that then links to the Web Product page... Which then links to the Web Stock on hand page. From here, the customer can be linked to Web Order.
- ✓
