

CSB Management Systems News Letter - October 2009

Dear Valued Client,

Over the last 12 months we have made some significant changes and enhancements to our System.

We have also seen the launch of version 9 of the revelation Database we use with the ability to now incorporate a full web based system as part of our system. However with this version there is also a change in the Licensing costs of all systems. An annual Licence fee per user is now payable. Details will be sent out once we have fully tested and upgraded our systems to version 9. This only applies to version 9 systems and does not affect any current systems.

Microsoft have also just released Windows 7. From the testings we have done it seems to be an improvement from previous versions. We have been running our software in Windows 7 for a while now without any problems. When installing Windows 7 - 64 bit version, please be advised that any Csoft systems using the DOS version and Version 3.x backwards WILL NOT work in Windows 7. If unsure please feel free to contact us in this regard.

Important Internal System Change:

We would like to advise that ALL Invoices and Statements will be emailed out as from next month instead of being mailed out. Should you wish to still receive these in paper format please advise us as such by return email to paper@csbmgmt.com with a heading of Paper Copy Please.

Important change required to your system

Before March 2010 we need to create new files on your system to allow your processing to continue beyond 2010. If not already done, you will be contacted over the next 6 months to give us access to your system to allow this to be done. This will be done at NO Charge to you, however if the PC you run your system on does not have internet access, we may need to come onsite to update your files which will incur a charge.

New Enhancements and Changes to our current system include the following:

1. Invoices can now be sent via E-Mail. Version 7.2 and above only. See www.csbmgmt.com.au/articles/discussionemailinvoices.pdf for more details.
2. Statements can now be sent via E-Mail. Version 7.2 and above only. See www.csbmgmt.com.au/articles/discussionemailstatements.pdf for more details.
3. Changes have been made to the Cash Book to improve the ease of doing Bank Reconciliations.
4. The Cash Book now includes FULL Multi currency bank accounts.
5. Enhancements to the General Ledger to include FULL Multi currency accounting.
6. Printing directly to Excel and Word have been improved.
7. More importing and exporting functions have been added.
8. An easier way of running upgrades have been added. This will only work where your firewall allows it
9. Realtime reporting options have been added. I.e. this means you can now run multiple reports with the click of one button, or event get it to run every day/week/month on demand.
10. A simple dashboard have been added to allow you to view say debtors owing, or sales for the day/month/year as it happens in a graphical or table format.
11. Various other enhancements have been made, so please feel free to discuss this or any other issues with us.

Thank you for your continued support,

CSB Management Team
